Impact made on PE in school.

The provision of PE from outside agencies allows

- pupils to access high quality teaching from well qualified and experienced coaches for two one hour sessions each week
- enables staff to observe good practice to apply to their own teaching
 - provides effective staff CPD for PE

Throughout the school pupils are encouraged to participate fully in lessons and to access a wide variety of after school clubs and inter-school competitions. A wide range of sports clubs are provided for pupils these include multi-skills, football, netball, cross country, athletics, cricket, rounders, streetdance, fencing, tennis, rounders. We participate regularly in inter-school tournaments these include hockey, netball, football, cross country, tri-golf, swimming, cricket, rounders, athletics and basketball. We have four sports ambassadors who meet regularly with the PE co-ordinator their role is to promote sport throughout school, develop fund-raising initiatives and lead small sided games and activities for younger children during lunchtimes.

'Be the best you can be' is a program that we introduced in 2011 and the values that it endorses are taught though school each year and it has become an ethos of the school, linking closely to PE.

Through the additional funding and arrangements for PE progress in physical development, co-operation skills, confidence and understanding of the importance of healthy lifestyles has and continues to improve. This year we have invested additional money to give our football team additional training, separate from the usual Friday club with a view to improving their skills and level of performance. We are also hosting a 'health week' in June which will promote healthy eating and healthy minds and bodies.
